

## Valentine's Menu Heating Instructions

It is easy to heat and serve your Valentine's Feast from Eatzi's. Just follow the heating instructions so all of your dishes arrive at the table or buffet at the same time! Please note that oven temperatures vary, so please use these instructions as a guide to the best preparation for your oven.

- **Preheat oven to 350°F.**

- Place the longest heating-time item in the oven first. Add each dish to the oven as the time difference passes.
- Lay out your serving bowls and platters so that you are ready to transfer the piping hot food as soon as it comes out of the oven.
- The more dense foods will hold their temperature longer (i.e.: risotto) so place them in the serving dishes first.
- Save plating the beef and lobster until last.

**Notes:**

- Transfer food to oven safe containers before heating.
- If directed to heat "covered," cover with aluminum foil.
- As you add items to your oven, rotate items by shifting items currently in the oven to the front and place the new additions in the back.
- Avoid stacking items if at all possible. If you must stack, be sure to rotate items so they are not "on top" for the entire heating process.
- Keep oven door closed to maintain temperature.
