

Thanksgiving Menu Heating Instructions

It's easy to heat and serve your Thanksgiving feast from Eatzi's! Just follow these heating instructions to ensure all of your dishes arrive at the table or buffet at the same time. Note that oven temperatures vary, so please use these instructions as a guide to the best utilization of your oven.

Preheat oven to 350°.

Place the longest heating-time item in the oven first. Add each dish to the oven as the time difference passes. For example, if you are serving dinner at 5 p.m., put the Butter Whipped Potatoes and Turkey in at 4-4:10 p.m., and the Honey Roasted Butternut Squash in at 4:15-4:20 p.m. Lay out your serving bowls and platters so that you are ready to transfer the piping hot food as soon as it comes out of the oven.

The more dense foods will hold their temperature longer (mashed potatoes, stuffing, etc.), so place them in the serving dishes first. Save plating the turkey (and other entrees) and vegetables until last.

Heat the rolls after you empty the oven and while you are transferring the food to serving dishes.

Notes

- Most items are presented with a clear, plastic lid. Always remove the plastic lid *before* warming. If directed to heat "covered," cover with aluminum foil.
- As you add items to your oven, rotate them by shifting items currently in the oven to the front and place the new additions in the back of the oven.
- If possible, avoid stacking items. If you must stack, be sure to rotate items so they are not "on top" for the entire heating process.
- Keep oven door closed to maintain temperature.

DISH	HEATING TIME @ 350°	SPECIAL INSTRUCTIONS
Assorted Pies	Warmed	Cover top with foil. Heat pie for 20 minutes. Remove foil and heat for an additional 5 minutes.
Pumpkin Cheesecake	Traditionally served chilled	Remove from refrigerator just prior to serving
