

Eatzi's Thanksgiving Menu Heating Instructions

Heating and serving your Thanksgiving meal is easy! Follow these steps to ensure all dishes are ready to serve at the same time.

Note: Oven temperatures may vary, so please use these instructions as a general guide.

Preheat oven to 350°F. Begin with the dish that requires the longest heating time and add each additional dish based on its specific time. For example, if you're planning to serve dinner at 5 p.m., place the Butter Whipped Potatoes and Turkey in the oven at 4:00-4:10 p.m., and add the Cranberry Brussels Sprouts at 4:15-4:20 p.m.

While the food heats, prep your serving area by laying out bowls and platters. Start with dense foods like mashed potatoes and stuffing, as they retain heat longer. Save the turkey, other entrees, and vegetables for plating last. When your oven is empty, warm the rolls while you transfer the rest of the food to serving dishes.

Important Notes:

- **Remove Plastic Lids:** Most items come with a clear plastic lid. Always remove it before heating. If heating "covered," use aluminum foil.
- **Rotate Items:** As you add new dishes, shift existing ones to the front of the oven and place new additions at the back.
- **Avoid Stacking:** If you must stack items, rotate them throughout the heating process so they don't stay on top for the entire time.
- **Keep the Oven Door Closed:** This helps maintain the oven temperature for even heating.

DISH	HEATING TIME: 350°F	INSTRUCTIONS
APPETIZERS
