

Eatzi's Hanukkah Menu Heating Instructions

Heating and serving your Hanukkah meal is easy!

Follow these steps to ensure all dishes are ready to serve at the same time.

Note: Oven temperatures may vary, so please use these instructions as a general guide.

Preheat oven to 350°F (all times are for conventional ovens)

Place the item with the longest heating time in the oven first. Add each additional dish as the time difference passes to ensure everything is heated and ready to serve together. Lay out your serving bowls and platters ahead of time so you're ready to transfer the hot food as soon as it comes out of the oven. Dense foods like Prime Rib or Chateaubriand hold heat longer, so transfer those to serving dishes first. Save plating latkes and vegetables for last to keep them warm.

Before heating, always remove any clear plastic lids and use aluminum foil if covering is needed. Place new dishes at the back of the oven, rotating existing ones to the front for even heating. Avoid stacking items, but if necessary, rotate them periodically to ensure all sides heat evenly. Keep the oven door closed to maintain a consistent temperature.
